Reasons For Allowance

The following is an examiner's statement of reasons for allowance: the closest prior art found are the cited patents to Stumpf (US 6,131,892) and Stumpf (US 4,451,946). Both patents show the use of overlapped pocketed spring strips that are secured together along a common vertical seam between adjacent pair of springs. In the '892 patent, the means of attachment is a discrete centrally located seam or tack 24 placed at the midpoint of the height of the spring pockets. The tack takes the form of a stylized "S" that lies across the previously formed vertical seams 14 used to form the spring pockets. Therefore the tack does not form a connecting seam that extends along the pocket height and is axially offset from the pocket seams as set forth in claim 1. Stumpf '892 also discloses that the pockets are not formed with a closing weld seam positioned adjacent an end of the pocket as set forth in claim 30, instead Stumpf uses a formed seam 20 that extends along the mid-height of the pocket. As is best shown in Figure 4, Stumpf also discloses that the pocketed strips are joined in units of four springs to form a square array, and as such the resulting assembly lacks the claimed second unattached set of pocketed coil springs set forth in the last clause of claim 40. Stumpf '946 is also deficient in showing all the claimed subject matter. In the '946 patent adjacent strips of pocketed coil springs are joined in a square array of sets of four spring by single unitary vertical seams 20 that extend contiguous with the pocket seams 22 of the adjacent pockets. Each of the pockets are formed by a single unitary vertical seam 22, and thus lacks the axially offset cross seams set forth in claims 1 and 30. Since the '946 patent also uses a square array type arrangement of joined spring strips it lacks the claimed second unattached set of pocketed coil springs set forth in the last clause of

claim 40. Finally, as regards claim 25 neither the '946 patent or the '892 patent suggests overlapping three strips and coupling them together by overlapping plies of material.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Moser et al, McCune et al, Mossbeck, and Stumpf et al (US 4,523,344) show pocketed spring coil mattresses that are of general interest.
